Embryo Transfer For an Accredited Louisiana Bred Quarter Horse Foal

Only one foal will be eligible to be Accredited Louisiana Bred per donor mare or recipient mare per year.

All donor and recipient mares must be reported to the LQHBA in writing by July 1 of the breeding year (or at the time of breeding if after May 1) with proper identification which includes copies of registration certificates, brands, markings, tattoos, ID chips, etc.

Embryo Transfers performed in Louisiana

The donor mare and the recipient mare must remain in the state of Louisiana from the time of conception until the foal is born and the accreditation process is complete.

Embryo Transfers not performed in Louisiana

(Effective March 11, 2006)-Embryo transfers may be performed outside of the state of Louisiana. Donor mares must not leave Louisiana and must be flushed within the state. The recipient mare must return to Louisiana with positive identification by July 1 of the breeding year and the LQHBA must receive written notification of the recipient mare's location in Louisiana by July 1 of the breeding year. The donor mare and the recipient mare must remain in the state of Louisiana until the foal is born and the accreditation process is complete.

***Exception: A donor mare may leave the state for the purpose of racing. The owner must notify the LQHBA before she leaves, and the donor mare must have an official start within 90 days at an AQHA recognized pari-mutual track. It is the responsibility of the owner to provide the LQHBA with official documentation of the donor mare's official starts and when she returns to the state.

The LQHBA Board of Directors will address the association's embryo transfer rules and policies annually.
